

Siobhán Murphy

Siobhán graduated in 2017 from Monash University with a Bachelor of Engineering (Mechanical) (Honours). Her final year project, in conjunction with Red Bull Air Race World Championship team Matt Hall Racing, was to design, build and test a new engine air intake system. Two weeks of intensive building and flight testing in Germany in September 2017 culminated in a new intake being used in the World Championship round at Lausitzring, Germany. In this race, Matt Hall Racing won qualifying and placed second overall. Further flight testing and proving of the intake was undertaken during race sessions at Lausitzring and Indianapolis (USA). Siobhán now holds a graduate engineer position at 5 Rings Aerospace and continues to be involved in aerodynamic development with Matt Hall Racing.
